Cardio Renew offers the most comprehensive, most effective, and fastest acting 100% liquid EDTA cardio system cleanse on the market. EDTA (Ethylene-Diamine-Tetraacetic Acid) is the primary component used in a process called ?chelation.? ED chelation therapy has been in practice for over 60 years and has been proven to eliminate heavy metals such as lead, mercury, and iron from the body.

Why Cardio Renew?

Cardio Renew offers the most comprehensive, most effective, and fastest acting 100% liquid EDTA chelation therapy products available today. Our unique EDTA cleanse offers the following:

- **Liquid EDTA** has been shown to provide up to 98% absorption, 10X the absorption rate of pills and capsules.
- **100% EDTA** with no buffers, fillers, or other ingredients. Additional ingredients may interfere with bioavailability and reduce the body?s absorption of EDTA, as well as its effectiveness.
- **Unaffected by stomach acids.** Our EDTA chelation therapy requires no digestion and passes unaffected through the stomach for absorption into the bloodstream.
- **A systematic approach.** Many companies sell EDTA along with many other products. At Cardio Renew, we focus solely on providing you with a comprehensive EDTA chelation program that best fits your specific needs.
