Why Cardio Renew Chelation Therapy?

Cardio Renew offers a comprehensive, effective, and fast acting 100% liquid EDTA chelation therapy. Our unique chelation therapy EDTA cleanse offers the following:

- **Liquid EDTA** has been shown to provide up to 98% absorption, 10X the absorption rate of chelation therapy pills and capsules.
- **100% EDTA** with no buffers, fillers, or other ingredients. Additional ingredients may interfere with bioavailability and reduce the body's absorption of EDTA, as well as its effectiveness.
- **Unaffected by stomach acids.** Our EDTA chelation therapy requires no digestion and passes unaffected through the stomach for absorption into the bloodstream.
- **A systematic approach.** Many companies sell EDTA along with many other products. At Cardio Renew, we focus solely on providing you with a comprehensive EDTA chelation therapy program that best fits your specific needs.
