## Featured Customer Comments

### Debra D Hubert

Hi, my name is Debra. I bought Angioprim original for my Mother, who suffers from cardiovascular disease, everythings clogged. I wanted to try it first before giving it to her. I was an athlete before an injury caused me to have a neck surgery ...

### Alan M. Rankin

I'm 50 yrs old and have cardiovascular disease. For the past 10 years I have had 5 heart stents placed. This has occurred every 2 years. As of November 2004, I would have been scheduled for "Open-Heart by-pass surgery, considering there is no ...

## ARTICLES

### "Angioprim Realizes 2nd Year of Continued Success"

For the past two years, we have been helping others who have suffered from various forms of vascular disease. We have accomplished this by remaining focussed on one objective: help others whenever/however possible.

Noticing the need for improved customer relations, we have added to our customer service team. It is now easier than ever to get your questions answered and orders placed. Whether the assistance is for you or for a friend/family member, we are committed to helping in any way we can.

You too, can help us help others. Below is a good overview on How Angiorim Works. Share it with those you know and care about.

### [How Angioprim Works](#)

The powerful Chelation action of Angioprim binds to the calcium in the plaque and remove it through bodies waste system. Once the calcium is remove the plaque begins to break down and dissolve, therefore opening your arteries and veins to increased blood flow.

### [Other Benefits from using Angioprim](#)

Angioprim can promote healing by stimulating hormone production that controls the phosphorus and calcium levels in the body. Calcium control can result in recalcification of bones.

Angioprim is a powerful antioxidant that can help control free radical damage. Free radicals are formed when oxygen interacts with certain molecules. Once formed these highly reactive radicals damage the body and cause aging. Antioxidants have been shown to improve the damage caused by free radical damage and therefore slows the aging process.

Angioprim can assist in enhancing the integrity of cellular and mitochondrial membranes. Fatigue is related to aging. It is well known that oxidative damage to mitochondria is related to aging. Improving mitochondrial function may reduce fatigue and increase energy levels to those found in young

adults.

Angioprim may increase tissue flexibility by uncoupling age-related cross-linkages that are responsible for loss of skin tone and wrinkling.

Add more 'years' to your 'life' ...and... more 'life' to your 'years'.

## **"Statin Drugs Actually Increase Heart Disease"**

Statin drug manufactures claim their drugs lower cholesterol and reduce the risk of heart disease. Doctor Ron Rosedale, MD shows the opposite to be true.

Indeed, low cholesterol levels have been shown to worsen patients with congestive heart failure, a life-threatening condition where the heart becomes too weak to effectively pump blood. Statin drugs have been shown to also cause nerve damage and to greatly impair memory. One reason that *Statin drugs* have these various serious side effects is that they work by *inhibiting* a vital enzyme that manufactures cholesterol in the liver. However, the same enzyme is used to manufacture *coenzyme Q10*, which is a biochemical needed to transfer energy from food to our cells to be used for the work of staying alive and healthy.

Statin drugs are known to *inhibit* our very important production of *coenzyme Q10*. Importantly, while many cardiologists insist that lowering cholesterol is correlated with a reduction in the risk of heart attacks; few can say that there is a reduction in the risk of mortality (death). That has been much harder to show. In other words it has never been conclusively shown that lowering cholesterol saves lives. In fact, several large studies have shown that lowering cholesterol into the range currently recommended is correlated with an increased risk of dying, especially of cancer. ## **Exciting Changes in the ISO Program**

[For more info on becoming an ISO Click here.](#)

In order to help our ISO's make more money, and to increase sales we have added two major tools. The first is the ability of any ISO to add Reps to their account. These Reps earn money while working with the ISO, but the ISO does not need to track their sales. The Rep will be paid by Angioprim, and the ISO will still earn their 20% We have also added a tremendous sales aid to help ISO's increase their revenue. If an ISO will gather a group of more than 10 people one of our Angioprim Seminar Advisors will come and do a presentation for you. These seminars have shown to be

**excellent at increasing sales and increasing profits for the ISO's. It's time for the ISOs to get their "Hands Dirty and Feet Wet" working the program.**

**Angioprim has always been an internet marketing based company. The addition of the ISO program has allowed us to get face to face with more prospective customers who are not on the internet or are not using the search tools on the internet. We are looking for customers who would like to make some money while helping others promote their health. The ISO program offers this to you. The chance to make that extra money to help pay for a better car, to save for a home addition, or to just add a little to that retirement.**
