

WHAT ARE THE INGREDIENTS IN CARDIO RENEW?

Cardio Renew is 100% liquid [EDTA](#) (ethylene-diamine-tetra-acetic acid)?a sodium-based free form amino acid. There are no other ingredients. This allows Cardio Renew to pass through the stomach unaffected into the duodenum, where it is absorbed directly into the bloodstream by the epithelium cells. An absence of additional ingredients also makes Cardio Renew exceptionally easy to digest; even those with digestive or dietary issues will experience no ill effects if taken as directed. However, as it is sodium-based, people with a sensitivity to sodium (i.e. salt) should be sure to monitor their blood pressure closely when using Cardio Renew.
