

CAN I TAKE CARDIO RENEW IF I AM ON OTHER MEDICATIONS?

Yes. Because Cardio Renew is made up of 100% EDTA (a free form amino acid), it is safe to take with most medications. Always wait at least three hours after taking your medication before taking Cardio Renew again. You should always consult with your health care provider prior to adding any new supplement to your health regimen. Do not stop or alter the use of your prescribed medication without first consulting with your physician. Please read our [disclaimer](#) for additional information.
